

Together we can tackle climate
change in drylands

Assets in drylands

Faces of climate change

Ultimate face of unsustainable resource management

Water sources are no longer safe for human consumption

Worried Turkana man with few goats

Pastoralist in Mandera laments death of his livestock

Do we really need guns to herd cattle?

Felling down trees and shrubs for charcoal burning increases desertification

What should be done?

We need to nurture local solutions to climate change

Public education a critical remedy to enable people adapt to climate change

Tree nurseries needed in every constituency

Rehabilitate degraded land by planting trees

Alternative energy harnessed to pump water from a borehole in Turkana

Aloe vera farming is a sustainable / alternative development alternative

Proper livestock mix to improve livelihood security in case of severe drought
